HOW TO READ SCORE HEATMAPS

A set of 3–5 questions from the SCORE survey helps to measure a certain phenomenon from different angles and to form an indicator.

For example, the PERSONAL SECURITY indicator is measured through three questions:

1 *To what extent do you feel safe from violence in your daily life?*

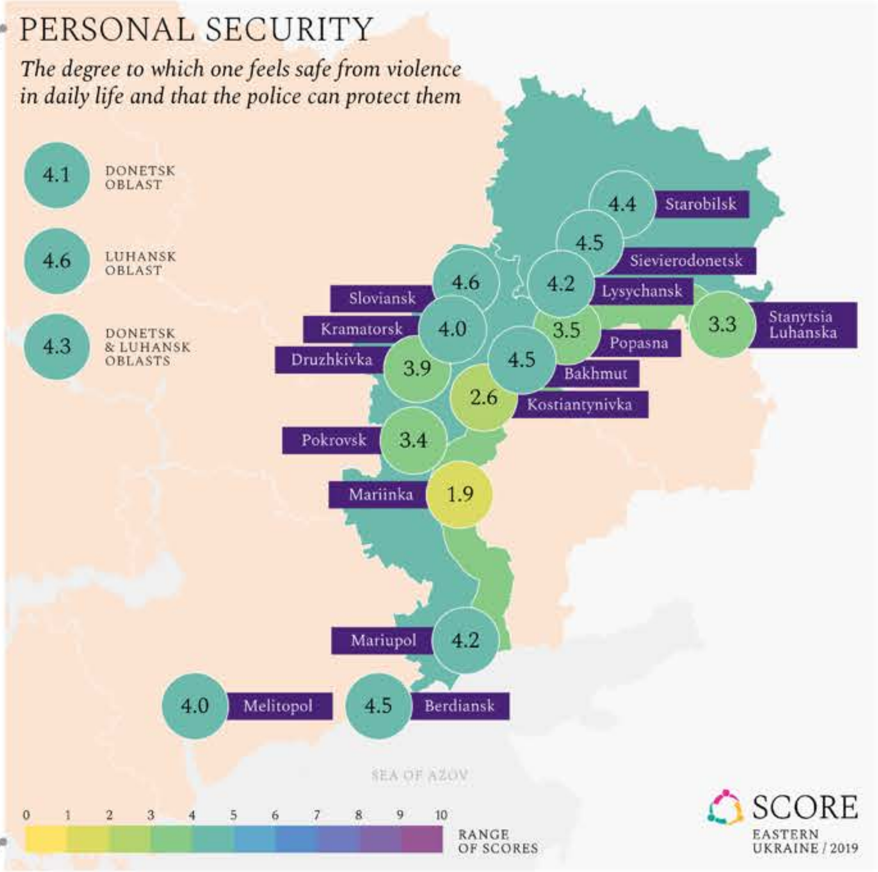
2 *To what extent do you feel confident that the police can protect you from violence?*

3 *To what extent do you feel safe walking alone in the street at night in your locality?*

Indicators are presented on heatmaps to demonstrate the geographical distribution of a measured phenomenon.

Each indicator has a value from 0 to 10, where 0 means the absence of phenomena in society and 10 means its absolute presence. Only differences greater than 0.5 are considered statistically significant.

SCORE for eastern Ukraine has more than 200 indicators measured across 12 dimensions (dimensions are mentioned in “content” slide).



PERSONAL SECURITY

The degree to which one feels safe from violence in daily life and that the police can protect them

4.1 DONETSK OBLAST
